

D Publishing sample cover

This is an example one of our cover designs. Where photos are shown, this image is just for reference: you will need to upload your own photos while you're creating your book online in our MyCover app.

You will be able to change the colour palette of the design online too – we've limited the colour palette choices so that the design will still look professional.

Please note: the width of your spine will depend on the number of pages your book has after it's converted. Some spines might be too small to have the title printed on them.
